# System Requirements

Java Version 11 – 15

## How to Use Tablature Converter

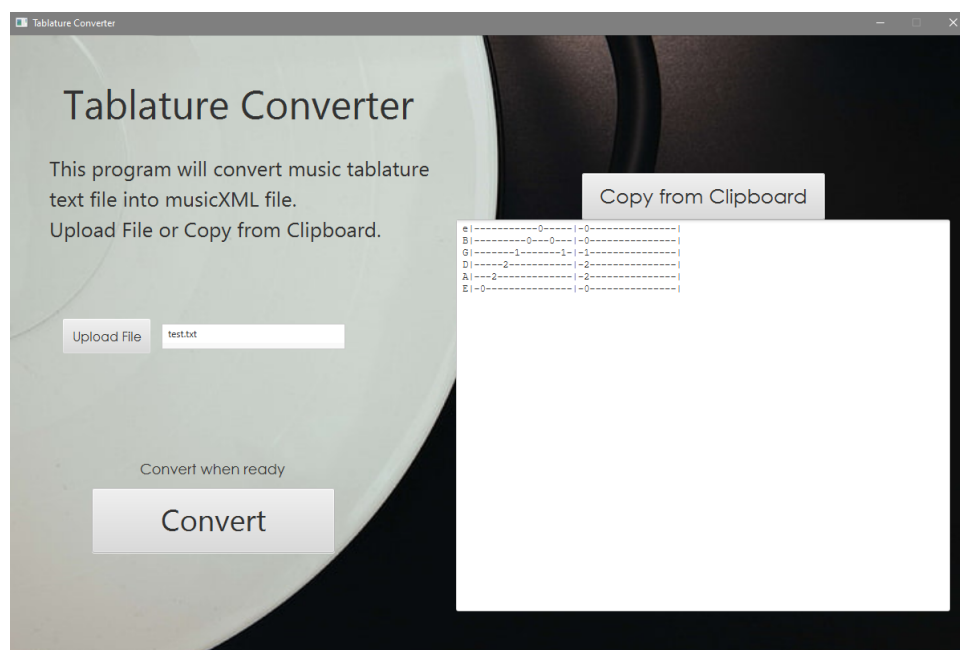

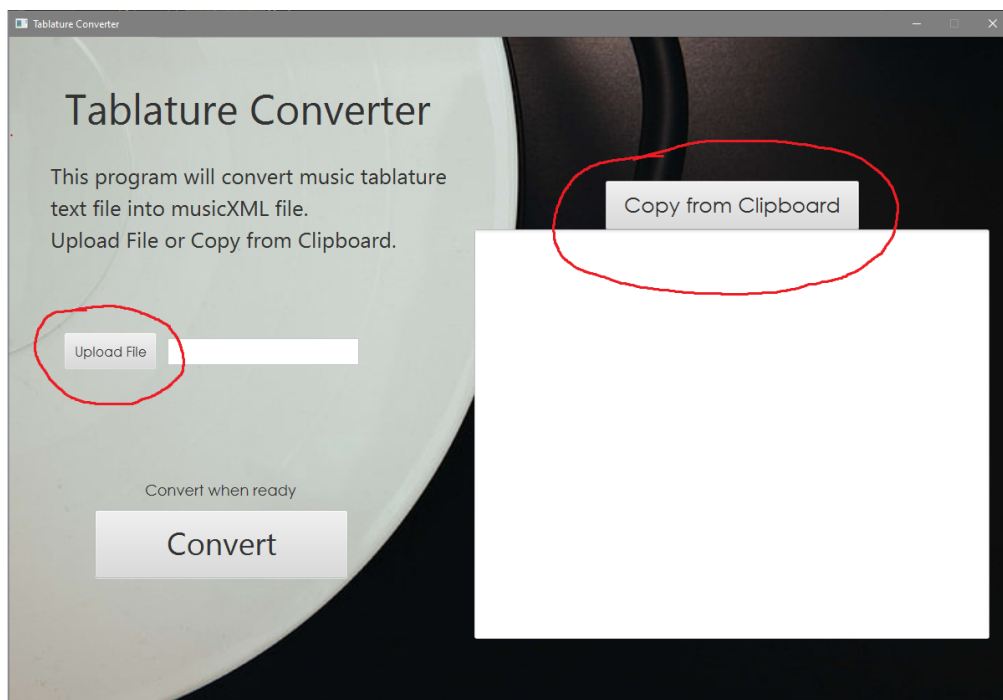

1. Run the gradle program. This window should open up.

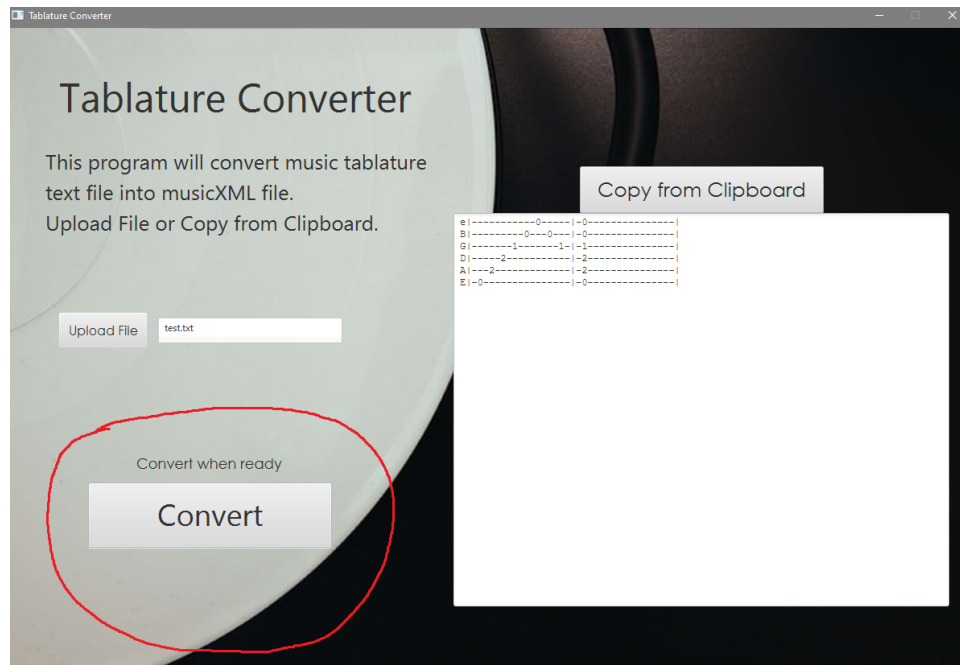

## 2. Import tablature to application. There are multiple ways to do this.

- a. Press “Upload File” button then choose a file. Contents of the file will be displayed to textarea and can be edited.
- b. Copy and paste tablature to the textarea

**NOTE: The converter will convert the contents in the textarea**

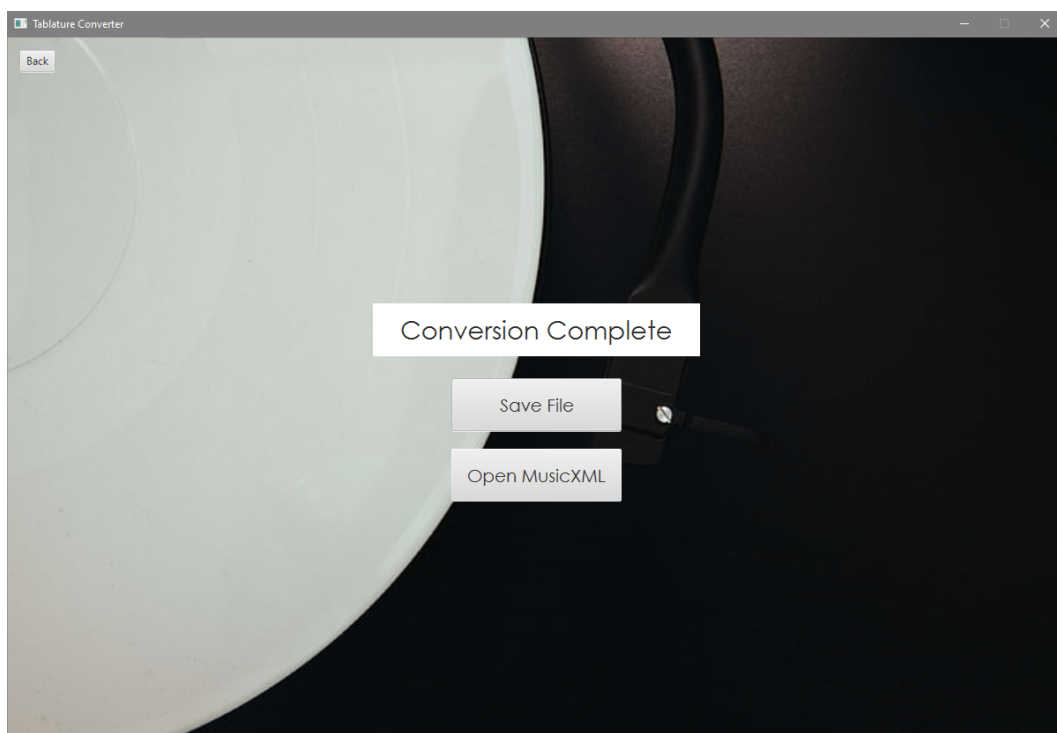

3. Press the “Convert” button.

4. The conversion is complete. A new scene will appear.

- a. Press “Save File” to save converted XML file in local file explorer.
- b. Press “Open MusicXML” button to open xml in browser

5. Press “Back” button to return to the previous page and convert another file.
